

Heilind Value Added Services

Heilind Electronics operates fully-equipped value added centers in Hong Kong and New Hampshire, USA offering a complete menu of part assembly, part modification, and packing services. Each facility has an in-house technical staff experienced in engineering custom manufacturing, packaging and tooling solutions for customers. Heilind value added centers provide a high quality, flexible and responsive resource delivering multiple customer benefits:

- Shortened lead times
- Consolidated SKUs
- Reduced manufacturing & handling costs
- Improved inventory performance & response to manufacturing

| 2. Pin Extraction | 5. Kitting and Special Packaging |
| 3. Connector Modification | 6. Tubing cutting - We Cut Reels and You Cut Costs |

Cut Headers

Heilind is tooled to cut both single-and dual-row, both boxed and stick headers on virtually any pin center from virtually any manufacturer. Buying headers cut-to-size, reduces costs, lead times and order minimums.

Pin Extraction

Rather than buying voided-pin, polarized headers from the manufacturer at high cost, high minimums and long lead times, allow Heilind to exact pins from standard, stock headers to reduce cost, shorten lead time, and avoid order minimums.

Connector Modification

Cutting off mounting ears, cutting slots, adding polarizing keys...many connectors can be simply and quickly modified to solve lead time or order minimum problems or to easily create an inexpensive custom solution for a unique application.

Reel and De-reeling Product

Heilind has the ability to reel or unreel product as needed and when needed to give you just the parts you want, only in the quantities you need, packaged the way you need them packaged.

Kitting and Special Packaging

Have a need to deliver parts to your manufacturing floor or to your end customer a particular way? Allow Heilind value added services to perform this important task for you. We work closely with your engineers and supply-chain managers to develop all bills of materials and process specifications and then handle all component modification, packaging, inspection, labeling and warehousing. We hold completed kits on our shelf, releasing to your production floor as required.

Tubing cutting - We Cut Reels and You Cut Costs

Many (maybe even most) customers buy their shrink tube cut to size, not on reels. We have a high-speed tubing cutter, we have the capacity to produce over 23,000 pieces of cut tubing per hour. We cut reels to match our customers' requirements, this results in significant cost savings for our customers: a win-win for all. There's no reason we shouldn't be able to sell lots of cut tubing. We want to help you win, let us know what you need.

Hong Kong

Unit 1707-1710, 17th Floor Delta House, 3 On Yiu Street, Shatin, New Territories, Hong Kong
