

BANDING SYSTEM

NORMA NORMETTA D-BAND

Plain Band | Smooth Band | Continuous Band Clamping System

Continuous and flexible band clamping system

- Continuous band in smooth version with a range of band widths
- Two different closure types to suit different applications
- Able to adapt itself to the shape and size of various objects
- Available in different material grades to cater different applications
- Deburred edges prevents workers from getting cut or injured
- Plastic dispenser for ease of storage and transport

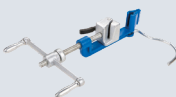

Applications

The continuous band clamping system is particularly suitable for carrying out retaining and repair work under difficult and extreme conditions, ideal for attaching and securing hoses, pipes, cables, ducts, signs or boards. It can be used in a wide variety of applications such as railway industry, building machines, pump and filter, irrigation systems, as well as retaining applications such as sealing pipes during repair work.

Electrical and Mechanical Characteristics

- Working temperature: -80°C~538°C
- Material:
 - 202: General purpose stainless steel 202
 - W4: Stainless steel 304 with excellent strength and corrosion resistance
 - W5: Marine grade stainless steel 316 prevents specific forms of corrosion (especially chloride)

Tooling

NORMAFIX™ NORMETTA D-BAND CLAMPING AND CUTTING TOOL				
Product Picture	Designation	Band Width	Description	Product No.
	DQL	8mm to 19mm	Provide tensile force of approximately 2,400 lbs	0870 5000 200
	LQD	4.6mm to 19mm	Unique 3-way handle for tight areas with minimal access	0870 5000 300
